DETAILED ACTION

1. Claims 1-22 are presented for examination.
2. In the specification paragraph 9:
 - a. line 3, "coupler" should be replaced with --compiler--.
 - b. Line 4, "at a" should be replaced with --as a--.
3. In claim 22, line 6; "cachén" should be replaced with --cache--.
4. This application is in condition for allowance except for the above formal matters.
 - a. Claims 1-22 are allowed over the prior art of record because none of the prior art of record teaches or fairly suggests the claimed features of the cache controller in association with the thread binary compiler for dividing the program into multiple threads and load the program as a recompiled program whenever the cache loads the program from the main memory, as recited in the independent claims.
 - b. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.
 - c. A shortened statutory period for reply to this action set to expire **TWO MONTHS** from the mailing date of this letter.
5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - a. Eickemeyer et al., 6,061,710, teaches a compiler for dividing a program into a plurality of threads.
